

畳 Tatami

伝統的な日本の床文化
Japanese Traditional Flooring

Since its establishment in 1907, Tamiya Tatami has succeeded in handing down Japanese traditional techniques to the present.

What's Tatami's great benefits to your health?

Good for your joint

Tatami's firmness helps the body to naturally adopt a correct sleeping posture while reducing tension on joints. Walking on tatami barefoot lessens the shock to the calves and knees due to the shock absorption if the rice straw mat is used for the underlaying sheet.

Easier to breathe

The rush reeds used in tatami removes carbon dioxide from the air. Rooms with tatami flooring smell better as the rush reed provide sweet aromatherapy.

Feels good

Excessive humidity can cause mold, mites, and termites, and it can cause mold to grow. Tatami straw absorbs excess humidity in a room, and naturally, it can release that excess humidity when needed as if it were breathing itself.

Keeps you warm in winter, cool in summer

Tatami floors are warm in winter. The intricate straw pattern acts as a blanket which disperses heat very slowly, and tatami construction provides for excellent sound absorption. In the summertime, tatami's surface is very cool to the touch because the woven rush creates some space between the contacted surface with your body to breathe.

TAMIYA TATAMI

TRADITIONAL

The TATAMI

OUTDOOR

TATAMI BENCH

All weather type tatami mats for outdoor use. It creates a piece of Japan in your garden.

Unconventional structure of Tatami Bench.

The internal structure of these tatami mats is made with our new technology, "Twin Corned" specifications. These are superior in breathability and drainage characteristics.

Relaxing with Family

With friends

Napping in the garden

Camping

At the Park

INTERIOR

ORIENT TATAMI™

You can create your own taste in your room with this Orient Tatami™, which can not be achieved by others. Orient Tatami™ mats can be laid anywhere, so you can easily create a tatami space as large as you want.

Just place tatami mats in the living room and it will become a Japanese space.

You can create a room with a calm texture.

Unlike carpets, there is no dust, so it is healthier for children.

The bedroom with mysterious atmosphere.

The bed turns into a storage space. A ninja bed that uses space well without waste.

OUR WORKS

EVENTS & PROJECTS

Participated Events & Projects

Franck Muller in Osaka

TOKYO MIDTOWN LOVERS SUMMER 2019 in Tokyo

SHINSYU FLOWER FESTIVAL in Nagano

We have created traditional and non-traditional Tatami products for various events and projects over the years. For inquiries, please e-mail us at web@tatamiya.gr.jp.

Established in 1971.
